SUMMARY

UI/UX Designer with experience delivering end-to-end digital products across iOS mobile, responsive web, SaaS dashboards, and e-commerce. Covers the full spectrum: user research, persona development, wireframes, interactive prototypes, and pixel-precise high-fidelity UI — with every deliverable grounded in user data and validated before handoff. Strong eye for visual design balanced with a methodical approach to UX problem-solving. Google UX Design Certified. 60+ screens across 6 projects, WCAG 2.1 AA compliant throughout.

SKILLS

UX: User Research · Persona Development · JTBD · Journey Mapping · IA · User Flows · Wireframing · Usability Testing · Heuristic Evaluation · Competitive Analysis · Card Sorting

UI: High-Fidelity Visual Design · Interaction Design · Component Design · Typography Systems · Colour Theory · Grid & Spacing · Responsive & Mobile-First Design · Motion Principles · Icon Design

Design Systems: Figma · FigJam · Primitive & Semantic Tokens · Auto Layout · Variants · Component Libraries · Figma Inspect · Developer Handoff Documentation

Accessibility: WCAG 2.1 AA · Colour Contrast · Focus States · Touch Target Sizing · Semantic Content Hierarchy

Collaboration: Cross-functional collaboration · PM & engineering handoff · Design critique · Agile/Scrum

Technical: HTML · CSS · Basic JavaScript · Basic React · Notion

EXPERIENCE

Freelance UI/UX Designer

Independent · Hyderabad, India | 2025 – Present

- Ran end-to-end UX process across 6 projects — user research, personas, IA, wireframes, user flows, high-fidelity design, and developer handoff — with WCAG 2.1 AA compliance on every deliverable.
- Conducted user research and usability testing to understand needs and pain points before designing; iterated designs based on findings, reducing estimated onboarding abandonment by 25–30% on the Habit Tracker app.
- Designed 60+ screens across iOS mobile, 1440px desktop, SaaS dashboards, and e-commerce — maintaining consistent typography, colour systems, and interaction patterns across every platform.
- Built Volt DS, a comprehensive Figma design system with 20+ components, 3-layer token architecture (primitive → semantic → component), dual light/dark themes, and platform-specific text styles for Web, iOS, and Android.
- Collaborated with product and engineering teams to implement designs accurately — complete Figma Inspect documentation on all projects, zero developer-reported specification gaps.
- Created wireframes, prototypes, and annotated flow documentation alongside every HiFi screen; delivered interactive prototypes for stakeholder review and usability validation before implementation.
- Placed 3rd at Humanity Founders AI Counsellor Hackathon 2025 — 8 HiFi screens and a clickable AI counselling prototype delivered in 48 hours.

PROJECTS

FlowFund — Personal Finance iOS App 2025

- Problem: Finance apps built for salaried users leave freelancers with irregular income, spending anxiety, and no real-time context — a fundamentally different user mental model.
- Full 7-step UX process: research-grounded personas, JTBD, 44-screen IA, 5 task flows, wireframes, visual design system — 30+ dark-mode screens, WCAG 2.1 AA throughout.

- Core interaction model (Safe-to-Spend) designed around user psychology. Principle: never make the user do math.

OnaWave Medical — Clinician Dashboard (Web) 2025

- Problem: No clinical-grade web tool for fast pattern recognition across 28-day menstrual cycle datasets. Clinicians needed speed and accuracy, not visual richness.
- Full process: domain research → clinician archetype → IA → phase-semantic colour system → HiFi → written design rationale. Estimated 60% reduction in interpretation time.

Habit Tracker — iOS App 2025

- Problem: Existing apps punish missed days, triggering shame loops. Redesigned the interaction model around forgiveness — missed days dim the streak, not reset it.
- 27+ screens, 100% edge case coverage: 15 onboarding states, 7 Today Tab states, Milestone celebrations at Day 3, 7, 21. Estimated 25–30% reduction in onboarding abandonment.

Volt DS — Figma Design System 2025

- Comprehensive Figma design system for Web, iOS, Android. 20+ components with all interactive states, dual themes, 3-layer token architecture. Single token change updates the entire system.

Bye-bye World — Unified Workspace (1440px) 2025

- 1440px desktop product designed in 48h: AI brief card, chronological feed, Messaging with inline rich task previews. Full design system — semantic tokens, shadow scale, typography, component library. Zero placeholder content.

VAUX — Men's Fashion Shopify Store 2025

- Brand identity, 8-section homepage, conversion-optimised product pages. Fully responsive at 1440px, 768px, 390px. End-to-end journey designed and QA'd in 48 hours.

EDUCATION

B.E. — Electronics & Communication Engineering

Methodist College of Engineering and Technology · Hyderabad | 2021 – 2025

CERTIFICATIONS

- Google UX Design Professional Certificate — Coursera / Google · 2024
- UI/UX Design Bootcamp — Udemy · 2024

AWARDS

- 3rd Place · Humanity Founders AI Counsellor Hackathon 2025 — Hyderabad · 50+ competing designers · 8 HiFi screens · 48 hours
